Diagram illustrating the Huffman tree construction process:

- Initial characters: a, b, cd, d
- First merge: a and b are merged into 'ab' (frequency 2), and c and d are merged into 'cd' (frequency 2).
- Second merge: 'ab' and 'cd' are merged into the root node 'abcd' (frequency 4).
- Third merge: 'a' and 'b' are merged into 'ab' (frequency 2), and 'c' and 'd' are merged into 'cd' (frequency 2).
- Final merge: 'ab' and 'cd' are merged into the root node 'abcd' (frequency 4).

The final tree structure is shown as a root node 'abcd' with children 'ab' and 'cd', where 'ab' has children 'a' and 'b', and 'cd' has children 'c' and 'd'.

Username	Data		Score
	Location	Height	
John	Second St.	180 cm	5
Wally	Third Av.	160 cm	10
Jason	Some St.	150 cm	15
Robert	123 Av.	190 cm	20
Other	Unknown St.	170 cm	25

a	height should be correct here
a	
a	
a	

This table should be contained within the page’s width:

<p>Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequae doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere.</p>	<p>Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequae doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguique possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et collaudata est, cum id, quod maxime placeat, facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et.</p>
---	---

Accept array of column alignments:

a	b	d	e	f
cccc	cccfd	esdfs	ffeff erfad	adspfp

Empty array inherits from outside:

a	b	d	e	f
cccc	cccfd	esdfs	ffeff erfad	adspfp

Accept array for fill:

a	b	c	d	e
dddd	eeee	fff	ggggg	hhhhh

Empty fill array is no-op:

a	b	c	d	e
dddd	eeee	fff	ggggg	hhhhh

Align and fill function tests:

a b	b	c	d	e
dddd eapdsfp	eeee eapdlf	fff	ggggg	hhhhh

Test division by zero bug:

Name	Entität	Eigenschaft
GammaTaurus	ThisIsASuperlongSymbolicName which is similar important as Supercalifragilistic	

Test superfluous row bug:

a		
	a	

Test gutter restrict top:

a	b	c
d	e	f

Test gutter restrict without gutter:

a	b	c
e	f	g
d	e	f

Test gutter split between pages:

[illegible]

a	b	c
a	b	c

Small gutter test:

a		b		c		d
a		b		c		d
a		b		c		d
a		b		c		d

Test fractional columns in an auto-sized block:

a	b	c
d	e	f
g	h	i

### Using the examples from issue #44:

1.

1A. table
-----------

1B. tablex

2.

2A. table plain block
-----------------------

2B. tablex plain block
------------------------

3.

3A. table breakable: true
---------------------------

3B. tablex breakable: true

4.

4A. table breakable: false
----------------------------

4B. tablex breakable: false

### Nested tables from issue #41:

- Triple-nested tables.

Lorem ipsum dolor sit amet, consectetur  
adipiscing elit, sed do.

- Quadruple-nested tables.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat.

### Nested tables from issue #28:

## table inside a table

A	A	A	A
---	---	---	---

following table fails

Problem/Observation: just one column “C”

Expected Outcome: Two columns

C	C
---	---

Exotic strokes from issue #49:

Stroke parsing regression from issue #55:

a
